

PRODUCT DESCRIPTION

Delta 22 is a medium viscosity, medium strength anaerobic bearing compound for continuous working temperatures up to 150°C.

APPLICATIONS

- Ideal to fill gaps up to 0.008" diameter clearance.
- High performance, controlled strength, versatile bearing compound.
- Used for fitting bearings, bushes and oil seals. Ideal for cylindrical parts that require disassembling. Permits sliding fit and eliminates distortion.
- Excellent retaining, sealing and thread locking compound.

ADHESIVE PROPERTIES	
Composition	Methacrylate Ester
Colour	Yellow
Viscosity <small>Brookfield RVT Spindle 4 @20 rpm</small>	1,000 cps at 25°C
Specific Gravity	1.07
Flash Point	>100°C
Solvent Content	None
Shelf Life	1 year

CURING PROPERTIES	
Handling Cure Time	30 minutes
Functional Cure Time	2 - 4 hours
Full Cure Time	24 hours
Compressive Shear Strength (ISO 10123)	
After 24 hours at 22°C	
Steel Pins & Collars	>12 N/mm ²
	> 1,500 psi
Temperature Range	-55°C to 150°C

PHYSICAL PROPERTIES	
Coefficient of Thermal Expansion ASTM D 696, K-1	80 x 10 ⁻⁶
Coefficient of Thermal Conductivity ASTM C 177,W/(m-K)	0.10
Specific Heat, kJ/(kg-K)	0.30

CHEMICAL RESISTANCE			
Chemical	Temp	% Initial Strength Retained	
		500 hours	1000 hours
Acetone	22°C	100	100
Ethanol	22°C	100	100
Motor Oil	125°C	100	100
Gasoline	22°C	100	100
Brake Fluid	22°C	100	100
Water/Glycol	87°C	100	95

DIRECTIONS FOR USE**For Assembly**

- For best results, clean all surfaces (external and internal) with D406 Surface Prep Cleaner and allow solvent to evaporate.
- If the material is inactive metal or the cure speed is too slow spray with Anaerobic Activator D405 and allow to dry.
- **For slip Fitted Assemblies** apply adhesive around the leading edge of the pin and the inside of the collar and use a rotating motion during assembly to ensure good coverage.
- **For Press Fitted Assemblies** apply adhesive thoroughly to bond surfaces and assemble at high press on rates.
- **For Shrink Fitted Assemblies** the adhesive should be coated onto the pin, the collar should then be heated to create sufficient clearance for free assembly.
- Parts should not be disturbed until sufficient handling strength is achieved.

For Disassembly

- Apply localised heat to the assembly to approximately 250°C. Disassemble while hot.

STORAGE

Anaerobic adhesives shall be ideally stored in a cool, dry place in unopened containers at a room temperature between 5°C to 25°C. Please do not return any unused material in its original container.

HEALTH & SAFETY

- Classification: Xi irritant
- Keep out of reach of children
- Refer to product Material Safety Data Sheet (MSDS).
